

**Lake** BY GUY GAGNON

This is the Dufault lake near Rouyn-Noranda in Quebec, Canada. Guy took it with an old 3 megapixel camera then turned it to mono in Photoshop using the Channel Mixer. He adjusted the contrast and luminosity in Curves then added new fine noise to give an overall old-fashioned feel to it.

**Boy** BY STEPHEN GOODALL

Stephen has brilliantly captured the fun expression and cheeky outlook of a young boy here, with his frame-filling shot. The choice of white shirt against a white background give it an advertisement poster-style effect. Clean, sharp and well executed.
